Country : NO / Language : EN	

1.1. Product identifier Trade name	· Arool 20
SDS no	: Arcal 39 : NOAL 1015
1.2. Relevant identified uses of the su	bstance or mixture and uses advised against
Relevant identified uses	 Industrial and professional uses. Perform risk assessment prior to use. Industrial and professional use for chemical analysis, calibration, (routine) quality control laboratory use, under controlled conditions. Contact supplier for more information on uses.
Jses advised against	: Consumer use. Uses other than those listed above are not supported, contact your supplier for more information on other uses.
1.3. Details of the supplier of the safet	ty data sheet
Company identification Supplier AIR LIQUIDE NORWAY AS Drammensveien 64 B 3050 Mjøndalen - NORWAY T + 47 32 27 41 40 info.norway@airliquide.com	
E-Mail address (competent person)	: eunordic-sds@airliquide.com
1.4. Emergency telephone number	
Emergency telephone number	: 112 / Giftinformasjon: + 47 22 59 13 00 Availability (24 / 7)
SECTION 2: Hazards identifica	tion
	<u>mixture</u>
2.1. Classification of the substance or	
	I (EC) No. 1272/2008 [CLP]
Classification according to Regulation	r pressure : Compressed gas H280
Classification according to Regulation Physical hazards Gases under	
Classification according to Regulation Physical hazards Gases under 2.2. Label elements	pressure : Compressed gas H280
2.1. Classification of the substance or Classification according to Regulation Physical hazards Gases under 2.2. Label elements Labelling according to Regulation (EC) Hazard pictograms (CLP)	pressure : Compressed gas H280

Country : NO / Language : EN

Arcal 39

2.3. Other hazards

Asphyxiant in high concentrations. Not classified as PBT or vPvB.

The substance/mixture has no endocrine disrupting properties.

SECTION 3: Composition/information on ingredients

3.1. Substances

Not established.

3.2. Mixtures

Name	Product identifier	Composition [V- %]:	Classification according to Regulation (EC) No. 1272/2008 [CLP]
Argon	CAS-No.: 7440-37-1 EC-No.: 231-147-0 EC Index-No.: REACH-no: *1	88	Press. Gas (Comp.), H280
Helium	CAS-No.: 7440-59-7 EC-No.: 231-168-5 EC Index-No.: REACH-no: *1	10	Press. Gas (Comp.), H280
Nitrogen	CAS-No.: 7727-37-9 EC-No.: 231-783-9 EC Index-No.: REACH-no: *1	2	Press. Gas (Comp.), H280

Full text of H- and EUH-statements: see section 16

Contains no other components or impurities which will influence the classification of the product.

*1: Listed in Annex IV / V REACH, exempted from registration.

*3: Registration not required: Substance manufactured or imported < 1t/y.

SECTION 4: First aid measures

4.1. Description of first aid measures

- Inhalation	 Remove victim to uncontaminated area wearing self contained breathing apparatus. Keep victim warm and rested. Call a doctor. Perform cardiopulmonary resuscitation if breathing stopped. 	
- Skin contact	: Adverse effects not expected from this product.	
- Eye contact	: Adverse effects not expected from this product.	
- Ingestion	: Ingestion is not considered a potential route of exposure.	
4.2. Most important symptoms and effects, both acute and delayed		

In high concentrations may cause asphyxiation. Symptoms may include loss of mobility/consciousness. Victim may not be aware of asphyxiation. See section 11.

4.3. Indication of any immediate medical attention and special treatment needed

None.

Country : NO / Language : EN

SECTION 5: Firefighting measures

5.1.	Extinguishing media	

- Suitable extinguishing media - Unsuitable extinguishing media	 Water spray or fog. Product does not burn, use fire control measures appropriate for the surrounding fire. Do not use water jet to extinguish.
5.2. Special hazards arising from the substance	or mixture
Specific hazards Hazardous combustion products	: Exposure to fire may cause containers to rupture/explode. : None.
5.3. Advice for firefighters	
Specific methods Special protective equipment for fire fighters	 Use fire control measures appropriate for the surrounding fire. Exposure to fire and heat radiation may cause gas receptacles to rupture. Cool endangered receptacles with water spray jet from a protected position. Prevent water used in emergency cases from entering sewers and drainage systems. If possible, stop flow of product. Use water spray or fog to knock down fire fumes if possible. Move containers away from the fire area if this can be done without risk. In confined space use self-contained breathing apparatus.
	 Standard protective clothing and equipment (Self Contained Breathing Apparatus) for fire fighters. Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask. Standard EN 469 - Protective clothing for firefighters. Standard - EN 659: Protective gloves for firefighters.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures			
For non-emergency personnel	: Act in accordance with local emergency plan.		
	Try to stop release.		
	Evacuate area.		
	Ensure adequate air ventilation.		
	Prevent from entering sewers, basements and workpits, or any place where its		
	accumulation can be dangerous.		
	Stay upwind.		
	See section 8 of the SDS for more information on personal protective equipment		
For emergency responders	: Wear self-contained breathing apparatus when entering area unless atmosphere is proved to be safe.		
	Oxygen detectors should be used when asphyxiating gases may be released.		
	See section 5.3 of the SDS for more information.		
6.2. Environmental precautions			
	Try to stop release.		
6.3. Methods and material for containment and cleaning up			
	Ventilate area.		
6.4. Reference to other sections			

O Air Liquide

SECTION 7: Handling and storage

7.1. Precautions for safe handling	
Safe use of the product	: Do not breathe gas.
	Avoid release of product into atmosphere.
	The product must be handled in accordance with good industrial hygiene and safety
	procedures.
	Only experienced and properly instructed persons should handle gases under pressure. Consider pressure relief device(s) in gas installations.
	Ensure the complete gas system was (or is regularily) checked for leaks before use. Do not smoke while handling product.
	Use only properly specified equipment which is suitable for this product, its supply pressure
	and temperature. Contact your gas supplier if in doubt.
	Avoid suck back of water, acid and alkalis.
Safe handling of the gas receptacle	: Refer to supplier's container handling instructions.
Care nandling of the gas receptable	Do not allow backfeed into the container.
	Protect containers from physical damage; do not drag, roll, slide or drop.
	When moving cylinders, even for short distances, use a cart (trolley, hand truck, etc.)
	designed to transport cylinders.
	Leave valve protection caps in place until the container has been secured against either a
	wall or bench or placed in a container stand and is ready for use.
	If user experiences any difficulty operating valve discontinue use and contact supplier.
	Never attempt to repair or modify container valves or safety relief devices.
	Damaged valves should be reported immediately to the supplier.
	Keep container valve outlets clean and free from contaminants particularly oil and water.
	Replace valve outlet caps or plugs and container caps where supplied as soon as container is disconnected from equipment.
	Close container valve after each use and when empty, even if still connected to equipment.
	Never attempt to transfer gases from one cylinder/container to another.
	Never use direct flame or electrical heating devices to raise the pressure of a container.
	Do not remove or deface labels provided by the supplier for the identification of the content
	of the container.
	Suck back of water into the container must be prevented. Open valve slowly to avoid pressure shock.
7.2. Conditions for safe storage, including	
<u> </u>	
	Observe all regulations and local requirements regarding storage of containers.
	Containers should not be stored in conditions likely to encourage corrosion.
	Container valve guards or caps should be in place.
	Containers should be stored in the vertical position and properly secured to prevent them from falling over.
	Stored containers should be periodically checked for general condition and leakage. Keep container below 50°C in a well ventilated place.
	Store containers in location free from fire risk and away from sources of heat and ignition. Keep away from combustible materials.
7.3. Specific end use(s)	

None.

SECTION 8: Exposure controls/personal protection 8.1. Control parameters OEL (Occupational Exposure Limits) : None available. DNEL (Derived-No Effect Level) : None available. PNEC (Predicted No-Effect Concentration) : None available.

Arcal 39

NOAL_1015
Country : NO / Language : EN

8.2. Exposure controls

8.2.1. Appropriate engineering controls	
	Provide adequate general and local exhaust ventilation. Systems under pressure should be regularily checked for leakages. Oxygen detectors should be used when asphyxiating gases may be released. Consider the use of a work permit system e.g. for maintenance activities.
8.2.2. Individual protection measures, e.g. person	al protective equipment
	A risk assessment should be conducted and documented in each work area to assess the risks related to the use of the product and to select the PPE that matches the relevant risk. The following recommendations should be considered: PPE compliant to the recommended EN/ISO standards should be selected.
Eye/face protection	: Wear safety glasses with side shields. Standard EN 166 - Personal eye-protection - specifications.
Skin protection	otandard EN 100 - 1 craonar cyc-protection - specifications.
- Hand protection	: Wear working gloves when handling gas containers. Standard EN 388 - Protective gloves against mechanical risk, performance level 1 or higher.
- Other	: Wear safety shoes while handling containers. Standard EN ISO 20345 - Personal protective equipment - Safety footwear.
Respiratory protection	: Standard EN 137 - Self-contained open-circuit compressed air breathing apparatus with full face mask.
	When indicated by a risk assessment, Respiratory Protective Equipment must be used. The selection of the Respiratory Protective Device (RPD) must be based on known or anticipated exposure levels, the hazards of the product and the safe working limits of the selected RPD.
	Self contained breathing apparatus (SCBA) or positive pressure airline with mask are to be used in oxygen-deficient atmospheres.
	Self contained breathing apparatus is recommended, where unknown exposure may be expected, e.g. during maintenance activities on installation systems.
• Thermal hazards	: None in addition to the above sections.
8.2.3. Environmental exposure controls	

None necessary.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties

Appearance	
- Physical state at 20°C / 101.3kPa :	Gas
- Colour :	Colourless
Odour :	Odourless.
	Odour threshold is subjective and inadequate to warn of overexposure.
pH :	Not applicable for gases and gas mixtures.
Melting point / Freezing point :	Not applicable for gas mixtures.
Boiling point :	Not applicable for gas mixtures.
Flash point :	Not applicable for gases and gas mixtures.
Flammability :	Non flammable.
Explosive limits :	Non flammable.
Lower explosion limit :	Not available
Upper explosion limit :	Not available
Vapour pressure [20°C] :	Not applicable.
Vapour pressure [50°C] :	Not applicable.
Density :	Not applicable
Vapour density :	Not applicable for gases and gas mixtures.
Relative density, liquid (water=1) :	Not applicable
Relative density, gas (air=1) :	Heavier than air.

Water solubility	: Solubility in water of component(s) of the mixture :			
	Argon: 67.3 mg/l Nitrogen: 20 mg/l Helium:	1.5 mg/l		
Partition coefficient n-octanol/water (Lo	g Kow) : Not applicable for gas mixtures.	Not applicable for gas mixtures.		
Auto-ignition temperature	: Non flammable.	Non flammable.		
Decomposition temperature	: Not applicable.			
Viscosity, kinematic : No reliable data available.				
Particle characteristics : Not applicable for gases and gas mixtures.				
9.2. Other information				
9.2.1. Information with regard to phy	sical hazard classes			
Explosive properties	: Not applicable.			
Oxidising properties	: Not applicable.			
9.2.2. Other safety characteristics				
Molar mass	: Not applicable for gas mixtures.	: Not applicable for gas mixtures.		
Evaporation rate	Not applicable for gases and gas mixtures.			
her data : Gas/vapour heavier than air. May accumulate in confined spaces, particularly at or be ground level.		nfined spaces, particularly at or below		

SECTION 10: Stability and reactivity	
10.1. Reactivity	
	No reactivity hazard other than the effects described in sub-sections below.
10.2. Chemical stability	
	Stable under normal conditions.
10.3. Possibility of hazardous reactions	
Reactivity	None under normal use. : None.
10.4. Conditions to avoid	. Noie.
	Avoid moisture in installation systems.
10.5. Incompatible materials	
	For additional information on compatibility refer to ISO 11114.
10.6. Hazardous decomposition products	
	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological information

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008		
Acute toxicity	: No toxicological effects from this product.	
Skin corrosion/irritation	: No known effects from this product.	
Serious eye damage/irritation	: No known effects from this product.	
Respiratory or skin sensitisation	: No known effects from this product.	
Germ cell mutagenicity	: No known effects from this product.	
Carcinogenicity	: No known effects from this product.	
Toxic for reproduction : Fertility	: No known effects from this product.	
Toxic for reproduction : unborn child	: No known effects from this product.	
STOT-single exposure	: No known effects from this product.
